PROFESSIONAL ARCHITECTS, CONSULTANTS & ENGINEERS

ADC KRONE | **PACE**

For the Consultant, Architect, Designer, or Engineer,

the pace of business has never been more brisk…

ADC KRONE | **PACE**

ADC KRONE understands the needs of modern networks, but also realises the importance of the environment.

Simple steps can be taken to conserve energy and reduce cooling costs.

ADC KRONE's innovative products and solutions can help you every step of the way in understanding what smaller cables, proper cable management and custom solutions can ultimately do to assist your efforts to go Green and save money.

Green Innovations
from ADC

Pick up the
PACE

As a consultant or network infrastructure professional, you're standing at the intersection of business and technology. The pace is rapid. The expectations from your clients, high: their tolerance for mistakes, low. While you're busy meeting client demands, you need a partner to turn to for the tools and resources that will make your job easier.

That's the compelling value behind PACE: ADC KRONE's exclusive program for Professional Architects, Consultants and Engineers. Membership in PACE is also one of the few times exclusivity doesn't come with high price.

Joining is absolutely free- and it opens you up to a world of benefits that will help you be more responsive to your clients. And at the end of the day, that's what really matters in your world.

...that's why ADC KRONE created PACE, a free program developed to support the infrastructure design needs of this select group of professionals.

• Are you a Telecommunications industry Architect, Consultant or Engineer?

• Are you involved in the Design, Planning and Construction of major buildings and infrastructure projects?

• Do you proactively help and advise your enterprise clients with their telecommunications network infrastructure and structured cabling planning and management needs?

IF YES, then please consider joining PACE, ADC KRONE's new support Program for Architects, Consultants and Engineers (PACE).

PACE is ADC KRONE's support program, specifically for Professional Architects, Consultants and Engineers (PACE). The aim of the PACE Program is to create mutually beneficial relationships with these parties with the Key benefit being access to information, tools and resources that ADC KRONE will provide to facilitate the design, consultancy, project management, development, and delivery of cutting edge solutions and tender winning plans & proposals.

By creating a network of professionals, the PACE Program will serve as a resource to help members stay abreast of the latest industry trends, emerging technologies, updates on the standards, and latest developments from ADC KRONE. PACE will also help you get first hand information on structured cabling and telecommunications technology that is driving innovation in the enterprise and service provider markets.
Registration is free. By simply logging on to www.adckrone.com/in and entering the PACE program today, you'll gain access to a wealth of rich content immediately.

What can you gain!

Access to first-hand Technology updates
• Technology updates
• Standards updates
• Upcoming Events
• Dedicated Web site
• Exclusive Training for PACE members

Access to Technical information
• White papers
• Case studies and References
• Technical spec sheets
• Product catalogues

Professional-Grade Products
For professionals serving Enterprise Clients
Network cabling infrastructure has become part of the building design where building consultants and Architects plan their cabling infrastructure requirements, in the initial phase itself.

ADC KRONE recognises the needs of such professionals and is committed to empower the Building consultants & Architects community with tools that will assist them in meeting these new challenges.

We believe in assisting you to plan and design your structured cabling network infrastructure alongside your building plan & design and not post completion.
ADC KRONE's structured cabling products are innovative and Engineered for Uptime™.

TrueNet® Structured Cabling Solutions. Engineered for Uptime.
ADC KRONE's TrueNet Structured Cabling System is an end-to-end, integrated portfolio of high-performance Copper and Fibre cabling systems, Cable Management and Physical Layer Management Solutions produced by a single global manufacturer for applications from the data centre to the desktop.

TrueNet products and cabling systems are designed and engineered to maximize the uptime of data centres and local area networks within enterprises around the world. In TrueNet, you have the reliability and throughput you need to support multiple generations of routers, switches and other active network gear. That's Engineered for Uptime.
PACE is a free registration program. So pick up your pace and join ADC KRONE's PACE program today.
