Fibre Panel – 19" Rackmount
FPS - 01, Fibre Panel 19" Rackmount – SC/LC

Product Description

ADC's FPS-01 series of Fibre panels provides industry leading fibre cable protection and management. The panel utilises an internal splicing system that creates a compact and easy fibre management solution. The splice tray for this panel will 'Slide-Out" for easy splice access.
The panel is available, pre-terminated with colour coded pigtails to simplify ordering and reduce installation time.

Features:

- Metal housing with movable drawer and integrated fibre management
- Integrated splice tray offers flexible splice management
- Each splice tray accommodates 12fibres
- Front door with latch for patchcord protection
- Best suited for rack mounting in horizontal and Equipment distribution areas
- Available in 24, 48 and 96 ports with SC adaptors
- Front Access for easy patchcord management.
- Cable management and routing limits bend radius and adds strain relief
- Slack storage in sliding tray to manage and protect excess optical fibre length
- Identification labelling
- Adjustable mounting bracket available for 19" and 21" rack mounting
- Colour coded pigtails used
